Muhammad Sarosh

Mobile Engineer | Flutter & Product Delivery

sarosh.mobileengineer@gmail.com | linkedin.com/in/sarosh-tahir | mobileengineersarosh.vercel.app
Islamabad, Pakistan | Open to remote and relocation opportunities

Summary

Mobile engineer with 5+ years shipping iOS and Android products across consumer apps, connected devices, subscriptions, and location-based platforms. Delivered 15+ client projects and 5 published apps; owns architecture, APIs, analytics, CI/CD, store releases, and production support. Improved crash stability by about 35% and reduced build-to-tester availability from about 30 to 10 minutes.

Technical Skills

Mobile: Flutter, Dart, Riverpod, GetX, Clean Architecture, MVVM, responsive iOS and Android UI
Product & Integration: REST APIs, Firebase, Google Maps, FCM, In-App Purchases, Arabic RTL
Growth & Backend: Mixpanel, Adapty, Superwall, Node.js, Twilio authentication, scheduled notifications
Quality & Delivery: Unit/Widget Testing, Crashlytics, GitHub Actions, Xcode Cloud, App Store, Play Console

Professional Experience

Easy To Use Apps SRL **February 2026 - Present**
Mobile Engineer *Part-time | Remote*

- Integrated Adapty and Superwall for iOS/Android subscriptions, entitlement flows, and remotely configured paywalls; instrumented Mixpanel funnels that showed an observed 15% onboarding improvement after product changes.
- Built Node.js functions for Twilio authentication and scheduled notifications, keeping credentials and trusted third-party service logic outside the mobile client.

Elite IT Team **September 2023 - January 2026**
Software Engineer (Mobile) *Full-time | Remote*

- Led Flutter delivery across 5 client applications (3 live), translating requirements and Figma designs into technical plans, maintainable features, and production releases.
- Reduced redundant API calls by about 20% through caching and request deduplication, and crashes by about 35% through Crashlytics-led triage and fixes.
- Automated iOS/Android builds with Xcode Cloud and GitHub Actions, reducing build-to-tester time from about 30 to 10 minutes.
- Reviewed code, resolved production blockers, and collaborated with design, backend, QA, and stakeholders on architecture and release decisions.

Outdey - Events & Ticketing

- Built discovery, ticketing, payments, chat, organizer tools, maps, notifications, and QR admission; extended Node.js/MongoDB-backed APIs and shipped to both stores.

UniX - Student Platform

- Took over a stalled 10+ module Flutter codebase, stabilized housing, community, messaging, maps, and notification journeys, and shipped to both stores.

glo - Beauty Discovery

- Independently delivered bilingual English/Arabic discovery, maps, filters, ratings, reviews, and RTL layouts for iOS and Android.

Sparkleo Technologies **August 2021 - August 2023**
Mobile Application Developer *Full-time | Islamabad*

- Delivered 10+ Flutter applications for wearable, medical, fitness, access-control, and other custom hardware products.
- Owned BLE workflows from permission and scanning through GATT communication, packet parsing, reconnect, recovery, and OTA updates.
- Integrated native Android/iOS SDKs through platform channels and mentored developers through practice projects, documentation, troubleshooting, and code reviews.

Education

National University of Sciences and Technology (NUST) **2017 - 2021**
B.S. Computer Science *Islamabad, Pakistan*
