Muhammad Sarosh

Senior Mobile Engineer | Flutter & Product Delivery

+92 303 4277385 | sarosh.mobileengineer@gmail.com | linkedin.com/in/sarosh-tahir | mobileengineersarosh.vercel.app

Islamabad, Pakistan | Open to remote, relocation, and employer-sponsored international roles

Summary

Senior mobile engineer with 5+ years shipping iOS and Android products across consumer apps, subscriptions, location-based platforms, and connected devices, including 5 published apps (3 at Elite IT, 2 at Sparkleo). Sole Flutter engineer on two multi-module products, owning architecture, APIs, analytics, CI/CD, and store release.

Technical Skills

Mobile: Flutter, Dart, Riverpod, Bloc, GetX, Clean Architecture, MVVM
Product & Integration: REST APIs, Firebase/Firestore, WebSockets, Google Maps, FCM, In-App Purchases, Arabic RTL
Growth & Backend: Node.js, MongoDB, Twilio, Mixpanel, Adapty, Superwall
Quality & Delivery: Unit/Widget Testing, Crashlytics, GitHub Actions, Xcode Cloud, App Store, Play Console

Professional Experience

Easy To Use Apps SRL **February 2026 – Present**
Mobile Engineer *Remote | Part-time*

- Implemented Adapty, Superwall, and Mixpanel purchase, entitlement, and paywall flows, contributing to a 15% improvement in the Mixpanel onboarding funnel versus the preceding period.
- Kept Twilio authentication and scheduled-notification logic in Node.js functions, protecting credentials and trusted workflows outside the mobile client.

Elite IT Team **September 2023 – January 2026**
Software Engineer (Mobile) *Full-time | Remote*

- Owned Outdey and UniX as the sole Flutter engineer, from architecture and integration through public iOS and Android releases; worked across 5 client apps in total, 3 published.
- Used REST for transactional workflows and Firebase/WebSockets for realtime updates, accepting two synchronization models to keep core operations predictable and live interactions responsive.
- Reduced repeated API requests by about 20% through caching and deduplication, and lowered Crashlytics-recorded crashes by about 35% through peer review and crash-led fixes.
- Automated iOS/Android distribution with Xcode Cloud and GitHub Actions, cutting build-to-tester time from about 30 to 10 minutes.

Outdey - Events & Ticketing App Store | Google Play

- Built discovery, ticketing, payments, chat, organizer tools, maps, and QR admission; extended Node.js/MongoDB-backed APIs and resolved store-review blockers.

UniX - Student Platform App Store | Google Play

- Took over a stalled application spanning 10+ student-life areas, stabilized REST/Firebase data flows, and shipped to both stores.

glo - Beauty Discovery App Store

- Independently delivered bilingual English/Arabic discovery with Google Maps, filters, ratings, reviews, and bidirectional RTL layouts.

Sparkleo Technologies **August 2021 – August 2023**
Mobile Application Developer *Full-time | Islamabad*

- Delivered 10+ Flutter applications for wearable, medical, sports, access-control, and custom hardware, including BlueDash and Plyomat released on both stores.
- Owned BLE workflows from permissions and scanning through GATT communication, packet parsing, reconnect, recovery, and OTA updates.
- Bridged vendor SDKs through Kotlin/Swift platform channels; onboarded and mentored 5 developers through documentation and code review.

Education

National University of Sciences and Technology (NUST) **2017 – 2021**
B.S. Computer Science *Islamabad, Pakistan*
